

## Do you want to learn about permafrost in Arctic Societies? 😊

We are offering, for the second year, the first interdisciplinary and community-oriented master's course: ***Permafrost in Arctic Societies*** (10 ECTS), held at the DTU Arctic campus in Sisimiut and Kangerlussuaq in Western Greenland!

### Who is it for?

The course is designed for master's students in engineering and geosciences and provides insights from permafrost-related disciplines, including physical geography, geotechnical engineering, and Arctic social sciences. All interested students in engineering or geosciences are welcome to apply.

### What will you learn?

Students will gain an understanding of thawing permafrost and its effects on Arctic communities, through a combination of fieldwork, lectures, labwork, mapping exercises, and interaction with local stakeholders and communities - blending theory, practice, and project-based learning.

Nordic team of lecturers

**When:** 10 May to 21 June 2027

**Application deadline:** 1 December 2026
